Distribution Set General Research Use

This consent group is released with the filename pattern **phs000276.NHLBI_NFBC66.v2.p1.c1.GRU**

Data Use Restrictions

Restriction label General Research Use (Consent code: c1)

Full restriction text Use of the data is limited only by the terms of the model Data Use Certification. There are no restrictions in the usage of the genomic results outside the study for which they were originally consented.

IRB approval required to use the data No

| | Description | pht002005.v1: (Data distribution set for General Research Use (GRU) consent) The dataset provides information about cardiovascular risk factors of subjects who are participants in the Northern Finland Birth Cohorts Program (NFBC) 1966, which examines the effects of preterm birth/intra-uterine growth retardation on morbidity and mortality in later life. Data include e.g. blood lipid values(HDL, LDL, triglycerides), BMI scores, C-reactive protein, glucose and insulin levels (n=17 variables), medication use, and basic socio-demographic information. The version 2 release includes exome and targeted sequence data. | |
